REMARKS

The figures of births and deaths shown in this statement for week ending the 25th February 1956 relate to 213 towns with an estimated population of 28,976 thousands. The total number of towns is 317 and their population is 41,516 thousands. Thus 67% of the total number of towns representing 70% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 16,140 and 6,855 representing birth and death rates of 29.0 and 12.3 per thousand of population respectively.

(a) *States (Part A and C).*—The data here relate to 117 towns with an estimated population of 23,329 thousands. Information about Delhi, Madhya Pradesh and West Bengal could not be included. The total number of towns is 252 and their population is 33,432 thousands. Thus 70% of the total number of towns representing 70% of the total population is covered. The number of births

and deaths recorded in these towns were 13,583 and 5,945 representing birth rates and death rates of 30.3 and 13.3 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of population.

(b) *States (Part B).*—The data here relate to 36 towns with an estimated population of 5,647 thousands. The total number of towns is 65 and their population is 8,084 thousands. Thus 55% of the total number of towns representing 70% of the total population is covered. The number of births and deaths recorded in these towns were 2,557 and 910 representing birth and death rates of 23.5 and 8.4 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
